---

Directorate General of Training (DGT) under the Ministry of Skill Development and Entrepreneurship (MSDE) is the apex body in the country as regards planning, formulating and prescribing norms, standards, procedures and guidelines in respect of various vocational training schemes of which Craftsmen Training Scheme (CTS) implemented in ITI's is the most important. Prescribing well designed curriculum and putting in place appropriate assessment and certification procedure are among the vital aspects of vocational training.

As per normal practice followed by DGT, the curriculum is kept updated through necessary changes / modifications from time to time, and so has been the case with the trade Mechanic Diesel also, of which Version 3.0 has been released and brought into force. This latest curriculum, as expected and desirable, has introduced some important and relevant topics especially relating to Constructional Details, besides a few changes relating to Cooling, Exhaust, Charging, Fuel Injection Systems.

In this new and latest edition of the book, all such additional topics including relevant Multiple-Choice Questions, have been added. As such the trainees of **Mechanic Diesel** trade would find this latest edition helpful in all respect.

This latest edition continues to follow the already well-accepted pattern of **3-in-1 volume** viz.,

- 1. Trade Theory**
- 2. Assignment (MCQs)**
- 3. Model Papers (Solved) inclusive of Bharat Skills Sample Question Papers for Annual A.I.T.T. Exam (CBT)**

We sincerely hope that trainees will find this latest edition of book very much helpful to adjust with the latest and updated curriculum of **Mechanic Diesel** trade. We ever remain open to suggestions from our readers for further improvement of this book in its subsequent editions.
