Publisher's Note

Overwhelming popularity of Kapil Dev's "Workshop Calculation & Science" book among ITI trainees and apprentices over the years has prompted us to bring latest editions of books which will fulfil the aspirations of trainees of all ITI trades to succeed in the new pattern of exams. DGT introduced the New Pattern of Trade Testing for final Trade Tests, which has put Training Officers and trainees in a fix situation since simple and easy study material of this pattern is not easily available in the market for vast and far flung areas of our country where ITIs are located.

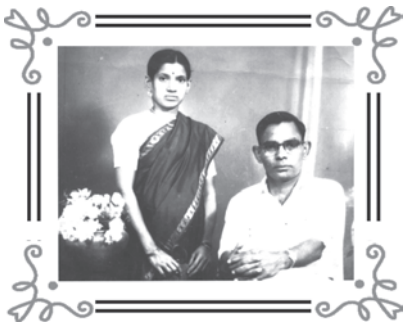

The reason for Kapil Dev's book being quite popular among trainees and Instructors is its easy and simple approach that is understandable by average trainees without difficulty.

Salient features of books under this new series are:

- ➢ Large no. of new pattern Solved Examples under each topic
- ➢ New pattern Assignment (with answers) – including Latest Exam Questions
- ➢ Easy Topics Summary in lucid language
- ➢ New Syllabus Strictly followed

We trust that with the help of this book, trainers and trainees will be highly benefitted in achieving success in their training and exams under the new pattern.
We wish for successful training and bright future for all trainees.

Dedicated to my parents

Smt. Gonella Venkata Lakshmi
(22-08-1930 to 08-12-2011)
Noble, Kind, Broad-minded, Large-hearted,
Symbol of sacrifice
who, besides up-bring her own children in hard conditions and despite being widowed at early stage of her life, helped many poor, economically backward, with food, clothes, school fees, irrespective of cast and religion.

Shri. Gonella Suryanarayana Murthy
(1916–1960)
He sacrificed his life for uplifting of school students providing financial assistance, food and clothes, besides giving free coaching to vocational trainees.

(G.V. Ramana Murthy)

CONTENTS

Topics	Pape No.	Topics	Pape No.

NSQF (Level-5) Competency based Core Skills Curriculum for Workshop Calculation and Science (1st and 2nd Year All CTS trades) ..... (vii–viii)

1st Year

1. BASIC FUNDAMENTALS 3–37

Units
Introduction; Definition; Classification of Units; S.I. Units; Inter-Relationship between Metric: and British Systems of Units

Fractions
Fractions; Lowest Common Multiple (L.C.M.); Highest Common Factor (H.C.F)

Decimal Fractions
Decimal Fractions; Multiplication of Decimals; Division of Decimals; Conversions of Fractions From One Form to Another; Multiplication and Division of Decimal with Number like 10, 100, 1000 etc.

Average
Average

Square Roots
Square and Square Roots; Symbol of Root; Method of Finding out the Square Root of a Number

Pythagoras Theorem
Pythagoras Theorem

Use of Scientific Calculator
Basic Operations

Assignment / Test 19

2. RATIO & PROPORTION, PERCENTAGE 38–64

Ratio
Ratio

Proportion
Proportion

Simple Belt Drive
Simple Belt Drive

Multiple Belt Drive
Multiple Belt Drive

Simple Gear Drive
Simple Gear Drive; Pitch; Important Terms; Transmission Ratio

Compound Gear Train
Compound Gear Train

Percentage
Introduction; Profit and Loss

Assignment / Test 52

3. MATERIAL SCIENCE 65–82

Metal; Properties of Metal; Ferrous and Non-ferrous Metals; Iron Ore; Pig Iron; Cast Iron; Wrought Iron; Steel; Types of Steels; Alloying Elements and their Influence on the Properties of Steel; Non-ferrous Metals; Non-ferrous Alloys; Building Materials

Assignment / Test 73

4. MASS, WEIGHT, VOLUME AND DENSITY 83–99

Density and Specific Gravity
Mass; Weight; Difference between Mass and Weight of a Substance; Density; Specific Gravity or Relative Density; Relation between Density and Specific Gravity

Determination of Specific Gravity
Hydrometer; Nicholson Hydrometer; Archemedes' Principle

Assignment / Test 93

5. WORK, POWER & ENERGY AND SPEED & VELOCITY 100–125

Work, Power and Energy
Work; Units of Work; Power; Units of Power; Horse Power of Engines; Mechanical Efficiency; Energy; Uses of Energy; Potential Energy and Kinetic Energy; Examples for Potential and Kinetic Energies; Transmission of Power by a belt-pulley Drive; I.H.P. of Steam and Petrol Engine

Linear Motion
Rest and Motion; Vector Quantity; Scalar Quantity; Speed; Velocity; Difference between Speed and Velocity; Acceleration; Equations of Motion; Motion Under the Force of Gravity; Distance Covered in the *n*th second; Recoil of Gun

Motion of Rotation
Important Terms; Motion of Rotation Under Constant Angular Acceleration; Relation Between Linear Motion and Angular Motion; Linear Velocity of a Rotating Body; Linear Acceleration of a Rotating Body

Assignment / Test 115

6. HEAT & TEMPERATURE AND PRESSURE 126–151

Heat and Temperature
Heat; Temperature; Difference between Heat and Temperature; Effects of Heat on a Body; Units of Heat; Boiling Point; Melting Point; Scale of Temperature; Special Properties of Mercury for Selecting as a medium in a Thermometer; Water Equivalent of Heat; Thermal Capacity; Latent Heat; Latent Heat of Fusion; latent Heat of Vaporisation; Calorific Value of Fuels; Indicated Thermal Efficiency; Brake Thermal Efficiency; Kelvin or Rankine Scale of Temperature; Transmission of Heat; Specific Heat; Temperature Measuring Instruments; Pyrometer; Thermo-Couple; Thermo Electric Pyromether; Radiation Pyrometer

Heat Lost and Heat Gain by a Body
Examples

Expansion of Solids
Coefficient of Linear Expansion; Superficial or Areal Expansion; Cubical Expansion

Pressure
Atmospheric Pressure; Over Pressure and Under Pressure; Absolute Pressure, Gauge Pressure and Vacuum Pressure; Manometers; Open Tube Manometer

Assignment / Test 141

7. BASIC ELECTRICITY 152–172
Electrical Power and Energy
Examples
Basic Electricity
Basic Electricity; Comparison and Advantages of D.C. and A.C. System; Basic Concept of Earthing
Concept of Electrical Terms
Concepts; Ohm's Law and its Applications
Series and Parallel Connections of Resistances
Series Connection; Parallel Connection; Extension of Instrument Range
Conductors, Insulators and Semi-conductors
Conductors; Insulators; Semiconductors
Assignment / Test 162

8. MENSURATION 173–224
Mensuration Related Formulae
Rectangle; Square; Parallelogram; Rhombus; Trapezium; Triangles; Pentagon; Hexagon;' Circle; Ellipse; Length of Belts; Area of Irregular Surface; Area of Four Walls; Length of Longest Pole Placed in the Room; Finding out Volumes of Solids
Areas of Quadrilaterals
Examples
Areas of Circles and Circular Sections
Examples
Relation between Sides and Diameters
Examples
Triangles
Examples
Properties of Angles and Triangles
Fundamental Geometrical Definitions; Types of Triangles; Lines Connected with a Triangle; Isosceles and Equilateral Triangles; Some Properties of Triangles
Calculation of Perimeters
Examples
Surface Area of Rigid Bodies
Examples
Volume of Rigid Bodies
Examples
Assignment / Test 203

9. LEVERS AND SIMPLE MACHINES 225–235
Levers
Levers; Application of Levers
Simple Machines
Simple Machines; Effort and Load; Mechanical Advantage; Velocity Ratio; Output and Input; Efficiency of Machine; Relationship between Efficiency, Velocity Ratio and Mechanical Advantage
Assignment / Test 230

10. TRIGONOMETRY 236–256
Trigonometry
Trigonometry; Trigonometrical Formulae; Some more useful Formulae; Use of Trigonometrical Tables; Use of Logarithmic Trigonometrical Tables
Sine Bar and Taper Turning Calculations
Sine Bar; Taper Turning Calculations
Assignment / Test 250

Appendix : Model Papers 1 to 10 (1st Year A.I.T.T. Annual Exam) ... 257–272

2nd Year

1. FRICTION 3–12
Friction; Advantages of Friction; Disadvantages of Friction; Methods of Reducing Friction; Normal Reaction; Limiting Friction; Laws of Limiting Friction Force; Co-efficient of Friction; Angle of Friction; inclined plane; Force of Friction when the Force is Inclined at an Angle θ with the Horizontal; Equilibrium of a Body on a Rough Inclined Plane Subjected to a Force Acting along the Inclined plane
Assignment / Test 9

2. CENTRE OF GRAVITY 13–17
Definition; Centroid; Methods of Finding out Centre of Gravity of Figures; Centre of Gravity of Certain Geometrical Considerations; Centre of Gravity Calculations
Assignment / Test 16

3. AREA OF CUTOUT OF REGULAR SURFACES AND AREA OF IRREGULAR SURFACES 18–26
Simpson's Rule
Examples
Pyramids and Frustums
Pyramid; Cone; Frustum; Examples
Assignment / Test 24

4. ALGEBRA 27–47
Algebra Fundamentals
Careful Consideration of Subject Items; Addition and Subtraction; Multiplication and Division
Algebraic Formulae and Applications
Algebraic Formulae; Factorization
Simple Equations
Equations; Quadratic Equations
Simultaneous Equations
Simultaneous Equations
Assignment / Test 35

5. ELASTICITY 48–76
Force
Newton's Laws of Motion; Unit of Force; To Find out the Resultant Force; Space Diagram; Vector Diagram; Representation of Force; Parallel Forces; Couple; Arm of a Couple; Moment of a Couple; Parallelogram Law of Forces; Conditions of Equilibrium; Kinds of Equilibrium; Some Examples of Equilibrium in Daily Life; Types of Forces; Law of Triangle of Forces; Converse of Triangle of Forces; Law of Polygon of Forces; Lami's Theorem; Moment of Inertia; Radius of Gyration; Centripetal Force; Centrifugal Force; Examples

Simple Stresses and Strains
Stress and Strain; Different Types of Stresses; Hooke's Law; Young's Modulus or Modulus of Elasticity; Yield Point; Ultimate Stress and Working Stress; Factor of Safety; Stress-Strain Graph; Modulus of Rigidity; Poisson's Ratio; Bulk Modulus; Relationship between Three Moduli for a given Material; Blanking Pressure to Punch a Hole on a Strip; Examples
Assignment / Test 64

6. HEAT TREATMENT 77–84
Heat Treatment; Annealing; Normalising; Hardening; Tempering; Case Hardening; Age Hardening; Heat Treatment of Cutting Tools; Heat Treating of Alloy Steels; Heat Treating of Cast Iron; Furnaces for Heat Treatment; Measurement of Furnace Temperature; Heat Treatment of Non-Ferrous Metals
Assignment / Test 81

7. PROFIT AND LOSS 85–95
Profit and Loss
Discount; Examples
Simple and compound interest
Simple Interest; Examples
Compound interest; Examples
Assignment / Test 92

8. ESTIMATION AND COSTING 96–99
Estimation and Costing; Examples
Assignment / Test 99

TABLES:
Logarithms ..... (i)–(ii)
Antilogarithms ..... (iii)–(iv)
Natural Sines ..... (v)–(vi)
Natural Cosines ..... (vii)–(viii)
Natural Tangents ..... (ix)–(x)
Logarithmic Sines ..... (xi)–(xii)
Logarithmic Cosines ..... (xiii)–(xiv)
Logarithmic Tangents ..... (xv)–(xvi)

Appendix : Model Papers 1 to 10 (2nd Year A.I.T.T. Annual Exam) ... 100–119
