

Preface

The book is intended to serve as a textbook on Engineering Graphics and Machine Drawing for degree/AMIE courses conducted by various Universities and Institutions in India for all branches of Engineering. It is the accepted text with large number of Institutions and Universities. A textbook on a subject like Graphics and Machine Drawing needs periodic updating. Due care has been taken while writing the book according to certain rules laid out by National and International Standards, Bureau of Indian Standards (BIS) and International Organisation for Standardisation (ISO) making the drafting and procedure for production practice more uniform for greater acceptance.

An extensive and exhaustive teaching experience in the field, exposure in renowned and well established organisations like BHILAI STEEL PLANT, ESCORT TRACTORS LIMITED, PUROLATOR FILTERS INDIA LIMITED have enabled the writers to cater to the demand of many aspiring students of engineering through this book.

Our special thanks to Prof. N.L Sachdeva, Ex. Principal, DCE, whose valuable suggestions have been instrumental while conceiving this text-book ; thanks are also due to Prof. Roop Lal, Prof. Raj Kumar, Prof. Virender Anand, Prof. Rajiv Kapoor of Delhi Technical University / D.C.E. / other Engineering Institutions, as many of their valuable suggestions / thoughts incorporated in this book. Their critical comments and advise were instrumental in the completion on this book.

The author also feels indebted to their colleagues Sh. A.K. Chaudhary, Sh. V.K. Sharma, Sh. S.C. Jain, Sh. Hira Singh, Sh. K.R. Ranjan, Sh. Verghees and others for encouraging in writing this book for degree courses.

Every effort has been made to make this book as complete as possible. But perfection can not be claimed and shall feel obliged to the teachers and users of this book for pointing out any mistake that might have crept in and suggestions for further improvement with a view to make this book more useful.

We are also thankful to ASIAN PUBLISHERS who have taken great care to publish this book with good get up, fine printing and reasonable price.

– Authors

Contents

PART - 1

1. Introduction to Engineering Drawing and Freehand Sketching 1 - 9

- 1.1 Introduction to Engineering Drawing
 - 1.2 Field of Application
 - 1.3 Drawing Standards
 - 1.4 Principles of Drawings
 - 1.5 Types of Drawing
 - 1.6 Freehand Sketching
 - 1.7 Sketching Material
 - 1.8 Sketch the Straight Lines
 - 1.9 How to Sketch Rectangle/Square
 - 1.10 How to Sketch Circles and Arcs
 - 1.11 Pictorial Sketches
 - 1.12 Line for Sketches
 - 1.13 Sketches on Graph Papers
 - 1.14 Orthographic Views
 - 1.15 Isometric Sketches
- EXERCISES

2. Drawing Instruments and their Use ... 10-15

- 2.1 Introduction
 - 2.2 Drawing Boards and Drawing Instruments
- EXERCISES

3. Size, Layout and Folding of Drawing Sheets 16 - 23

- 3.1 Introduction
 - 3.2 The Size of Drawing Sheets
 - 3.3 Identification Zones
 - 3.4 Drawing Sheet Formate
 - 3.5 Marginal Marking
 - 3.6 Title Block and Tables
 - 3.7 Folding of Prints
- EXERCISES

4. Lines and Lettering 24 - 36

- 4.1 Lines
- 4.2 Use of Lines
- 4.3 Thickness and Proportional Dimensions of Lines
- 4.4 Order of Priority of Coinciding Lines
- 4.5 Termination of Leader Line
- 4.6 Lettering

- 4.7 Shape of Proportion
 - 4.8 Gothic Lettering
 - 4.9 Styles of Lettering
 - 4.10 Lettering Characteristics
 - 4.11 Spacing in Single Stroke
 - 4.12 Size of Alphabets and Numerals
 - 4.13 Range of Nominal Sizes
 - 4.14 Lettering Gothic
 - 4.15 Gothic Lettering (Instrumental)
 - 4.16 Double Stroke Vertical Gothic Lettering
 - 4.17 Double Stroke Inclined Letters
 - 4.18 Spacing in Double Stroke
- EXERCISES

5. Dimensioning 37 - 48

- 5.1 Introduction
 - 5.2 Classification of Dimensions
 - 5.3 Definition
 - 5.4 Types of Dimensioning
 - 5.5 Dimensioning Terms and Notations
 - 5.6 Method of Dimensioning
 - 5.7 Some Correct Method of Dimensioning
 - 5.8 Points to Remember while Dimensioning
 - 5.9 Arrow Heads
 - 5.10 Systems of Dimensioning
 - 5.11 Methods of Dimensioning
- EXERCISES

6. General Geometrical Construction .. 49 - 59

- 6.1 Introduction
- 6.2 Straight Line
- 6.3 Curved Line
- 6.4 The Parallel Straight Line Curve
- 6.5 Angle
- 6.6 Bisecting a Straight Line
- 6.7 Bisect an Arc
- 6.8 Bisect an Angle
- 6.9 Parallel Lines at a Given Distances / Curves
- 6.10 Division of Line
- 6.11 Draw an Arc Passing From any Three Given Points
- 6.12 Regular Polygon

6.13 Draw a Regular Hexagon Outside a Given Circle	10.3 Oblique Projections
6.14 Tangents	10.4 Procedure to Draw the Oblique Projection
6.15 Tangent to a Straight Line and an Arc	10.5 Length of the Receding Lines
6.16 To Draw an Arc Tangent to two Circles	10.6 Angles, Circles and Circular Arc in Oblique Projection
6.17 To Draw a reverse or OGEE Curve Connecting Two Parallel Lines	10.7 Drawing an Oblique View
6.18 Special method to draw the pentagon	10.8 Comparison of the Oblique Projection with the Isometric Projections
EXERCISES	EXERCISES
7. Projection of Points, Lines, Planes and Solids 60 - 120	11. Missing Lines and Missing Views . 186 - 197
7.1 Projection of Points	11.1 Introduction
7.2 Projection of Lines	11.2 Projection Method
7.3 Projection of Planes	11.3 Pictorial View Method
7.4 Projections of Solids	11.4 Reading of the Object
EXERCISES on Points, Lines, Plane and Solids	EXERCISES
8. Scales 121 - 137	12. Isometric Views 198 - 219
8.1 Introduction	12.1 Introduction
8.2 Representative Fraction (R.F.)	12.2 Tree of Pictorial Projection
8.3 Essential Information for Drawing, Scale	12.3 Isometric Axes and Planes
8.4 Types of Scales	12.4 Isometric Projection
8.5 Vernier Scales	12.5 Isometric Scale
8.6 Backward Vernier	12.6 Isometric Projection and Isometric View
8.7 Construction Method	12.7 Methods for Drawing ISO Views
8.8 Direct Vernier	12.8 Isometric Projection of a Square Prism when its Axis is (a) Vertical (b) Horizontal
8.9 Nomograph or Alignment Chart	12.9 Different Positions of a Plane with Different of Planes
EXERCISES	12.10 Off set Method for Projecting Plane Curves in Isometric
9. Orthographic Projection..... 138 - 170	12.11 Four Centre Method for Drawing an Approximate ISO View of Circle
9.1 Projection	Solved Problems
9.2 Orthographic Projection	EXERCISES
9.3 Planes of Projection	13. Sections 220 - 243
9.4 Methods of Projection	13.1 Importance
9.5 First Angle Projection	13.2 Conventional Representation of Materials
9.6 Third Angle Projection	13.3 Conventional Breaks
9.7 Choice of Views	13.4 How Sectioning is Done ?
9.8 Special Views	13.5 Types of Sections
9.9 Partial Views	13.6 Arrangement of Successive Section
9.10 Local Views	13.7 Sectioning of Webs
9.11 Lay Out of Six Views	13.8 Auxiliary Section
9.12 Identification of Lines and Surfaces	13.9 Aligned Section
EXERCISES	13.10 Sectioning Large Areas
10. Auxiliary and Oblique Views 171 - 185	13.11 Hatching to Indicate Different Type Material
10.1 Auxiliary Views	
10.2 Drawing an Auxiliary View	
Miscellaneous Problems on Auxiliary Views	

- 13.12 Some Important Points to be Consider in Sectioning
 - 13.13 Preferred and True Projection Through Ribs and Holes
 - 13.14 Section of Ribs and Webs
 - 13.15 Arms and Spokes Sectioning
 - 13.16 Sections of Nut, Bolt, Stud and Rivot
 - 13.17 Convention to Standard Parts Solved Problems
- EXERCISES**

14. Engineering Curves 244 - 265

- 14.1 Introduction
- 14.2 Conic Sections
- 14.3 Conics defined with respect to the plane sections to the axis of a cone

- 14.4 Conic sections defined with respect to the cone
 - 14.5 Ellipse Construction
 - 14.6 To find the axes of an ellipse, with conjugate diameters given
 - 14.7 Parabola
 - 14.8 Practical Applications
 - 14.9 Hyperbola
 - 14.10 Equilateral Hyperbola
 - 14.11 Spiral of Archimedes
 - 14.12 Helix
 - 14.13 Involute
 - 14.14 Cycloid
 - 14.15 Tangent and Normal
 - 14.16 Epicycloid and Hypocycloid
- EXERCISES**

PART - II

1. Machine Drawing and Abbreviations 267 - 275

- 1.1 Introduction
- 1.2 Working Drawing
- 1.3 Classification of Machine Drawing
- 1.4 Types of Assembly Drawing
- 1.5 Important Features in Machine Drawing
- 1.6 Abbreviations
- 1.7 Conventions

2. Section of Solids and Developments 276 - 306

- 2.1 Introduction
 - 2.2 Terms used in Sections of Solids
 - 2.3 Section Plane
 - 2.4 Solved Problems
 - 2.5 Development
 - 2.6 Types of Development
 - 2.7 Parallel Line Development
 - 2.8 Radial Line Development
 - 2.9 Solved Problem
- EXERCISES**

3. Intersection of Solids 307 - 319

- 3.1 Introduction
 - 3.2 Classification of Surfaces
 - 3.3 Method of Determination of Line or Curve of Intersection
 - 3.4. Solved Problems
- EXERCISES**

4. Rivets and Riveted Joints 320 - 339

- 4.1 Introduction
 - 4.2 Fastener
 - 4.3 Clasification of Fastener
 - 4.4 Rivets
 - 4.5 Rivet Holes
 - 4.6 Riveting
 - 4.7 Caulking and Fullering
 - 4.8 Loading Condition of Rivet
 - 4.9 Standard Rivet Head
 - 4.10 Structured Rivet Heads
 - 4.11 Boiler Rivet Heads
 - 4.12 Small Rivet Head
 - 4.13 Rivetted Joint
 - 4.14 Lap Joint
 - 4.15 Different Type of Lap Joints
 - 4.16 Arrangement of Rivets
 - 4.17 Butt Joint
 - 4.18 Different Types of Butt Joints
 - 4.19 Terms and Definition
 - 4.20 Solved Problems
 - 4.21 Combined Lap and Butt Joint
 - 4.22 Joints connecting plates and angles
 - 4.23 Structural Joint
 - 4.24 Lozenze or Diamond Butt Joint
 - 4.25 Simplified Representation of Fastener : As per the SP-46-2003
- EXERCISES**

5. Welded Joints and Symbols 340 - 350

- 5.1 Introduction
 - 5.2 Welding
 - 5.3 Advantages and Disadvantages of Welding Joints over Riveted Joints
 - 5.4 Welding Process
 - 5.5 Types of Welded Joints
 - 5.6 Positions of Symbols on Drawings as per SP-46-1988
 - 5.7 Relationship Between the Arrow Line and the Joint
 - 5.8 Position of the Arrow Line
 - 5.9 Basic Welding Terms
 - 5.10 Symbols
 - 5.11 Dimensioning of Welds
 - 5.12 Main Dimensions used in Welding
 - 5.13 Length of Welds
 - 5.14 Size of Weld
 - 5.15 Symbols and Applications
- EXERCISES

6. Screw Threads 351 - 365

- 6.1 Importance and Application of Screw Thread
 - 6.2 Nomenclature of Screw Threads
 - 6.3 Thread Forms
 - 6.4 Square Threads
 - 6.5 Knuckle Thread
 - 6.6 Acme Thread
 - 6.7 Buttress Thread
 - 6.8 Straight or Cylindrical Threads
 - 6.9 Multiple Thread
 - 6.10 Comparison of 'V' and Square Thread
 - 6.11 Combination of 'V' and Square Thread
 - 6.12 Thread Conventions
 - 6.13 Convention of Internal Thread
 - 6.14 Convention of Internal Thread in Section
 - 6.15 Convention of Blind Tapped Hole
 - 6.16 Conventional Representation of Threaded Assemblies
 - 6.17 Conventional Representation of Tapped Hole with Bolt in Assembly
- EXERCISES

7. Screwed Fasteners 366 - 398

- 7.1 Introduction
- 7.2 Bolted Joint
- 7.3 Bolt Terminology
- 7.4 Specification for Bolts and Nuts
- 7.5 Nut

7.6 Types of Nut

7.7 Washer

7.8 Types of Washers

7.9 Types of Bolt

7.10 Prevention of Rotation of Bolt Head

7.11 Hook Bolt

7.12 Taper Bolt

7.13 Screws

7.14 Studs

7.15 Drilled Holes and Threaded

7.16 Examples of assembly of bolt, stud and screws

7.17 Foundation Bolt

7.18 Locking Arrangement

7.19 Locking Devices

EXERCISES

8. Keys and Cotters 399 - 406

8.1 Introduction

8.2 Keys

8.3 Classification of Keys

8.4 Sunk Key

8.5 Saddle Key

8.6 Multiple Spline

8.7 Cotter

8.8 Comparison Between Keys and Cotters

8.9 Gib

EXERCISES

9. Cotters and Knuckle Joint 407 - 420

9.1 Cotter Joint

9.2 Significance of Clearance

9.3 Use of Cotter Joint

9.4 Advantages and Disadvantages of Joint

9.5 Joints used for Connecting Rods

9.6 Coupler

9.7 Turn Buckle

EXERCISES

10. Shaft Coupling 421 - 446

10.1 Introduction

10.2 Kinds of Shaft Coupling

10.3 Sleeve or Solid Muff Coupling

10.4 Half Lap Muff Coupling

10.5 Split Muff Coupling

10.6 Flange Coupling

10.7 Splines

10.8 Universal Coupling / Hooke's Joint

10.9 Clutches

10.10 Oldham Coupling

10.11 Compression Coupling

EXERCISES

11. Assembly of Wooden Joints 447 - 493

- 11.1 Introduction
- 11.2 Sliding Bearing
- 11.3 Journal Bearing
- 11.4 Pivot or Foot Step Bearing
- 11.5 Thrust or Collar Bearing
- 11.6 Types of Journal Bearings
- 11.7 Foot Step Bearing
- 11.8 Anti Friction Bearing
- 11.9 Brackets and Hangers
- 11.10 Pulley
- 11.11 Solid Cast Iron Pulley
- 11.12 Split Pulley
- 11.13 Built-up Pulley
- 11.14 Speed Cone Pulley
- 11.15 Rope and 'V' Belt Pulley

11.16 Fast and Loose Pulley

EXERCISES

12. Pipe and Pipe Joints 494 - 509

- 12.1 Introduction
 - 12.2 Pipe designation
 - 12.3 Pipe Joints
 - 12.4 Pipe Fittings
 - 12.5 Screwed Joints
 - 12.6 Welding Joints and Solder Joints
 - 12.7 Flange Joints
 - 12.8 Socket and Spigot Joints
 - 12.9 Union Joints
 - 12.10 Hydraulic Pipe Joint
 - 12.11 Expansion Joint
 - 12.12 Conventional Symbol of Fitting
- EXERCISES**
