

Preface to NSQF Compliant Edition

Directorate General of Training (DGT) under the Ministry of Skill Development and Entrepreneurship (MSDE) is the apex body in the country as regards planning, formulating and prescribing norms, standards, procedures and guidelines in respect of various vocational training schemes of which Craftsmen Training Scheme (CTS) implemented in ITI's is the most important. Prescribing well designed curriculum and putting in place appropriate assessment and certification procedure are among the vital aspects of vocational training.

Some changes have recently been brought about with respect to curriculum of designated trades under CTS, especially with regard to their compliance with appropriate NSQF levels. These changes have been made effective with the commencement of admission session of 2022. The latest syllabus (version 2.0) for Health Sanitary Inspector (sector: healthcare) as revised in July 2022 has since been notified by DGT. The significant change has been revision of NSQF level of this trade to three.

A health sanitary inspector is a professional employed in various industries to oversee the standard health and sanitation conditions. His job is to visit various food facilities, public health nuisances to inspect that standard safety measures as regularised by state / central government authorities are properly followed. He oversees biological, physical and chemical workplace hazards and reviews safety conditions.

The system of trade test for trade theory subject continues to be through multiple choice questions (MCQs). This Q-Bank has been prepared keeping precisely this aspect in mind. It comprises of a rich set of MCQs for different topics according to latest syllabus and arranged on DGT – NIMI modular pattern. Added to this, a significant aspect is that essential explanatory notes to MCQs have been included so that trainees choose the correct options to MCQs with proper understanding. Moreover, three model papers have also been included for trainees to practice within limited time as they would be required to face in All India Trade Test.

We sincerely hope that trainees will find this Q-Bank very much helpful to adjust with the latest change in syllabus related to Health Sanitary Inspector trade. We would welcome suggestions for further improvement of this Q-Bank in its subsequent editions.

–G.S. Sethi

Contents

Module 1: Food and Nutrition [Multiple Choice Questions]	1–5
Answers	3
Explanatory Notes	4
