

## Preface

"Automobile" is a very complex and exhaustive subject. It was my urge to make it simple and easy, that inspired me to write this book. It would not be an exaggeration to say that in the book much has been expressed in too few words.

Complete information about automobiles has been provided through nearly 1000 questions and their brief but apt answers. A salient feature of the book is that besides providing theoretical knowledge on the subject, solutions to various common practical problems have also been discussed.

It is my sincere hope that the book will prove highly useful to the trainees of the Motor Mechanic, Diesel Mechanic and Tractor Mechanic trades as also to all those curious to acquire knowledge of this subject. The trainees can make use of the book during their training period and as a key to success during their examinations.

Finally, I would like to express my gratefulness to ASIAN PUBLISHERS and their associates who extended co-operation to the author as well as the readers by publishing this book.
