

PREFACE

Whenever a craftsman has to appear for an interview or a viva voce test, he desires to revise and recollect his knowledge within a short time. It becomes very difficult for him to go through a theory book at that time. This simplified and small sized book will prove to be 'ray of light' for him at such occasion.

The book will present point to point answers to the questions asked generally during such viva voce tests. In addition to this, the book will also work as a self-explanatory guide-book for all such persons who are interested to know about electricity and its fundamentals.

The book has been prepared in accordance to the latest NCVT and CAC syllabus. It is hoped that the book will definitely help all candidates of electrical trades in regaining their confidence while appearing for an interview.

CONTENTS

Chapters	Page No.
1. Introduction	1
2. Basic Electricity	3
3. D.C. Circuits	7
4. Work, Power and Energy	10
5. Primary and Secondary Cells	13
6. Magnetism and Electromagnetism	19
7. D.C. Generators	23
8. D.C. Motors	29
9. A.C. Circuits	32
10. Alternators	37
11. Poly-phase Circuits	39
12. Transformers	41
13. Polyphase Induction Motors	45
14. Single Phase Motors	49
15. Electric Instruments	52
16. Winding	55
17. Illumination	60
18. Electronics	63
19. Wiring and Earthing	66
20. Converters and Rectifiers	68
21. Electrical Devices and Installations	70
22. Electrical Appliances	72
Objective Question-answers :	
Part-A : True-false type	73
Part-B : Choose the correct ans. type	78
Part-C : Fill in the blanks type	83
