

Preface

Some years ago, a new concept in the field of development of application software was thought of by which such multi-faceted software could be developed which is capable of using all available resources of a business organization beside accounting and inventory control so that the organization can reap profits at optimum levels. It has been given the name ERP (Enterprises Resource Planning). This was the first step with which 'Management' was related to 'Information Technology'. This experiment remained successful beyond expectations and all large organizations have been using it to achieve their targets. SAP is the leading name with regard to development of ERP software. It is after the evolution of ERP concept that 'Management' as a subject started getting recognition for incorporation with formal computer education. Consequently, 'Management' is now taught in almost all courses like BCA, MCA, B.Sc. (IT), M.Sc. (IT) and other similar courses of all universities and institutions.

As for the study of Management goes, it started between 17th and 18th century in Europe and America, since Industrialization had already begun there. Mass production and betterment in quality of products could become possible only due to good Management. Exploiting the large work force to increase production and taking the company towards maximum profit is the basic principle of Management. Companies like 'Ford' set precedence of good management in the 'Mechanical era' itself ; the mass production theory is followed by vehicle manufacturers the world over even today.

In present times, we use computers and do not have to face the difficulties of Mechanical era. Today we can access and communicate information to any place in fraction of a second. It has become possible to analyse information and draw results with a click. Computers are being vastly used today for planning beside accounting. When power of computer is associated with Management, the results we get are of excellent quality.

This book has been conceived for the students of various degree and diploma courses in computers so that they can get the knowledge of different basic principles of management and give broad dimension to their ideas in which computer education is not isolated from management. This will lead to a multi-dimensional vision making it possible to construct excellent applications. This book will provide up-to-date information about various branches of management with respect of latest requirements of present times. Necessary knowledge of Management Information System and Information Technology has also been added in the book so that students can get complete topics of their syllabus in one book. It is trusted that this book will prove to be equally useful to students of computer science as well as management courses and students will not require a separate book for Information Technology topics.

Suggestions from our valuable readers for further improvement in next edition of the book are welcome.

Contents at a glance

[PART-I]

1. Management: An Introduction	1-29
2. Planning and Organising	30-61
3. Motivation and Leadership	62-81
4. Technology Roadmapping	82-96

[PART-II]

5. Report and Presentation	97-125
6. Management Information System	126-159
7. Business Process Management	160-171
8. Business Process Reengineering	172-186

[PART-III]

9. Decision Concepts and Components	187-220
---	---------

[PART-IV]

10. Human Resource Management	221-241
11. Organisation Design and Structure	242-259
12. Project Management	260-287
13. Material Management	299-303
14. Disaster and Business Continuity Management	304-318

[PART-V]

15. Computer Application	319-333
16. Information Technology	334-375
17. E-commerce	376-400

Appendix: Top Business Organisation	401-424
--	----------------

- The Coca-Cola Company	402
- IBM (International Business Machine)	407
- Mittal Steel Company	411
- WAL-MART	413
- Reliance Industries Ltd.	419
- Mc-Donald	421

Contents in detail

[PART-I]

1. Management: An Introduction	1-29
Functions of management	3
Principles of management	5
Business Administration	7
Administrative functions	7
Central Administration	8
Historical Development	9
19th century	9
Supply and demand	11
Price elasticity of demand	12
Economic surplus	13
Marshallian surplus	13
Quasi-rent	13
20th century	14
Business philosophies and popular management theories	15
Management fad	15
21st century	16
Nature of management	17
The importance of control	18
Managerial levels/hierarchy	18
Senior management	18
Middle management	18
Low-level management or Supervisors	19
Management Development	20
What management development includes:	20
Managerialism	21
Managing upwards	21
Understanding your boss' context	21
Understanding yourself	22
Management styles	22
Micromanagement	23
Areas and categories of management	23

2. Planning and Organising	30-61
Planning in Organization	31
What is Plan?	32
The Business plan	32
Business Plan Content, Presentation Formats	33
Marketing plan, Marketing planning process, Corporate mission	34
Corporate vision	35
Objectives for non-profit-making organizations	35
Marketing audit	36
Analysis	37
Marketing objectives	38
Emergent strategy	39
Marketing strategies	41
Detailed plans and programmes	43
Content of the small business marketing plan	44
Use of Marketing Plans	44
Budgets as Managerial Tools	45
Approaches to budgeting	45
Automated planning and scheduling	46
Organizing, Applications	47
Structure, Work Specialization, Chain of Command	48
Authority, Responsibility, and Accountability, Delegation	48
Line and Staff Authority	49
Span of Management, Tall vs. Flat Structure	49
Centralisation, Decentralisation, and Formalisation	49
Departmentalisation	49
Importance of Organising, Managing director	50
Roles and responsibilities	50
Communication, Purposes of Communication	51
Organizational communication	52
Assumptions underlying early organizational communication	52
Types of Communication Flow	53
Flow of Communication	53
Induction, Channels, Meetings	53
Interviews, Constitution, Narrative	54
Identity, Interrelatedness of organizational experiences, Power	55
Control in Management, Definition	56
Characteristics of Control, Internal control, Definitions	57
Internal control activities, Limitations, Controller	57
Coordination, Staffing, Recruitment	58
E-Recruitment	59
Recruitment Process Outsourcing, Benefits, Problems	60

3. Motivation and Leadership	62-81
Drive Reduction Theory	63
Regulation of behavior, Rewards and incentives	64
Intrinsic motivation	64
Extrinsic motivation	65
McClelland's achievement motivation theory	66
McClelland's Theory of Needs	66
Achievement, Affiliation, Power	66
Thematic Apperception Test	67
Implications for Management	67
Goal-setting theory	67
Controlling motivation	69
Early programming	69
Organization, Drugs	69
Applications in Education, In Business	71
Leadership	71
Categories and types of leadership	72
Leadership cycles	73
Leadership as a phase in human life-cycles	73
Scope of leadership	74
Determining what makes "effective leadership"	74
Multifactor Leadership Questionnaire (MLQ)	75
Qualities of leadership	75
Situational leadership theory	76
Leadership "styles"	77
Leadership's relation with management	78
Leadership by a group	79
Co-leadership	79
Divided leadership	80
Alternatives to leadership	80
4. Technology Roadmapping	82-96
The Roadmapping process	84
Phase 1: Preliminary phase	84
Satisfy essential conditions	85
Provide leadership / sponsorship	85
Define the scope and boundaries for the technology roadmap	85
Phase 2: Development phase	86
Identify the "product" that will be the focus of the roadmap	86
Identify the critical system requirements and their targets	86
Specify the major technology areas	87
Specify the technology drivers and their targets	87
Identify Technology alternatives and their timelines	88

Recommend the technology alternatives that should be pursued	88
Create the technology roadmap report	88
Planning and Business Development Context for Technology Roadmapping	88
Knowledge and skills required	88
The purpose of technology Roadmapping	88
Portfolio Management for New Products	91
Product software development	92
What is Information systems?	92
Portfolio management	92
Product lining	93
Domain and Application Engineering	94

[PART-II]

5. Report and Presentation	97-125
Auditor's report	100
Auditor's report on financial statements	100
Unqualified Opinion report	101
Qualified Opinion report	101
Adverse Opinion report	103
Disclaimer of Opinion report	103
Report on internal controls of public companies	105
Going concern	105
Other explanatory information and paragraphs	106
Opinion shopping	107
Other engagements and reports	108
Internal auditor's report	108
Credit Report	112
How credit rating is determined?	113
Presentation, Methods of presentation	114
Useful illustrations	114
Growth-share matrix	114
Chart or Graph	114
Practical Use of the Boston Matrix	115
Relative market share	116
Market growth rate, Other Uses	116
SWOT analysis	117
Internal and external factors	117
Strengths and weaknesses	118
Opportunities and threats	118
Errors to be avoided	119
Use of SWOT Analysis	119
Corporate planning	120
Human resources	120

Marketing	120
Presentation program	121
Knowledge visualization	122
Information graphics	123
Interactive visualization	123
6. Management Information System	126-159
Information as a message	127
Information as a pattern	128
Information as sensory input	129
Information as an influence which leads to a transformation	130
Information as a property in physics	130
Information as Records	131
Knowledge	131
Communicating knowledge, Situated knowledge	132
Partial knowledge, Knowledge management	133
Knowledge engineering	133
Knowledge Engineering Principles	134
Views of Knowledge Engineering	134
Knowledge representation	134
Information processing	135
Information architecture	136
Management information system	137
Background, Intended benefits	138
Relation to other sciences	139
Management by objectives	139
Key performance indicators, Identifying indicators	140
Areas to be analyzed	141
Categorization of indicators, Information technology management	142
IT portfolio management	142
Computer Based MIS: ERP	143
Manufacturing, Supply Chain Management	145
Financials, Projects, Human Resources	145
Customer Relationship Management	145
Data Warehouse	145
Implementation	147
Consulting Services	147
Customization Services	148
Maintenance and Support Services	149
Advantages	150
Disadvantages	151
Limitations of ERP	151
ERP modeling	152

Executive information system	153
Components, Hardware, Software	154
Interface	155
Telecommunication, Applications	156
Manufacturing, Marketing	156
Financial, Advantages, Disadvantages	157
Enterprise Information System	158
7. Business Process Management	160-171
Business process management activities	162
Process design, Process execution, Process monitoring	162
Future of BPM, Business process modeling	163
Business process automation, Delivery	164
Extension of existing IT systems	164
Purchase of a specialist BPA tool	165
Purchase of a Business Process Management solution with BPA extensions	165
Purchase of a Middleware solution	165
Business Process Automation (BPA)	165
vs Business Process Management (BPM)	165
The role of service-oriented architecture (SOA) with respect to BPA	166
Business Process Mapping	167
Process architecture, Architecture	167
Bottom-Up: Starting with the manifested process	169
Top-down: From Idea to Implementation	169
Process Structure	169
8. Business Process Reengineering	172-186
Definitions of BPR	174
The role of information technology	176
Methodology	177
BPR - a rebirth of scientific management?	179
Successes	182
Critique	185
[PART-III]	
9. Decision Concepts and Components.....	187-220
Decision theory	189
Normative and descriptive decision theory	190
What kinds of decisions need a theory?	191
Choice between incommensurable commodities	191
Choice under uncertainty	191
Pascal's Wager	192
Intertemporal choice	192
Social and socio-cognitive decisions	193

Complex decisions, Paradox of choice	193
Alternatives to probability theory	193
Decision making	194
Decision making style	195
Cognitive and personal biases in decision making	195
Cognitive neuroscience of decision making	196
Decision making in groups	197
Decision making in one's personal life	199
Decision making in business and management	199
Decision-makers and influencers, Advantages, Decision analysis	201
Decision support system	202
Taxonomies	204
Architectures	206
Characteristics and Capabilities of DSS	208
Spatial Decision Support System, How does an sDSS work?	209
Self service software, Expert system	210
Types of problems solved by expert systems	211
Expert systems versus problem-solving systems	212
Individuals involved with expert systems, The end user	213
The knowledge engineer, The inference rule	214
Chaining, Confidences	215
The user interface, Procedure node interface	217
Advantages of Expert system, Disadvantages of Expert system	219

[PART-IV]

10. Human Resource Management	221-241
Human resource development in relation to recruitment and selection	226
Human resource management, Academic theory	228
Business practice, Skills management	229
Individual Employees, Line Managers, Organization Executives	230
Time management	230
Task list, Task list organization	232
Software applications	232
Generations of time management	233
ABC analysis for time management	233
Pareto analysis for time management	233
Fit for time management, POSEC method	233
Eisenhower-Method	234
Performance appraisal	234
Human resource management systems	235
The HR function's reality	235
Job analysis, Purpose, Methods	237
Results, Systems	239
Applicant tracking system	240

11. Organization Design and Structure	242-259
Organization in sociology	243
Organizations in virtual worlds, Organization development	244
Definition	245
Organizational culture	246
Classifying organizational culture, Blame culture	246
Multi-Directional Culture	247
Live and Let Live Culture, Brand Congruent Culture	247
Leadership Enriched Culture, Elements of culture	248
Entrepreneurial Organizational Culture	249
Measurement Of Organizational Culture, Industrial and organizational psychology	249
Organizational empowerment	250
Influence through context, Create an atmosphere of inclusion	250
Don't take back the power, Support employee empowerment	251
Communicate a clear mandate, Equip people for success	252
Employees, Practice open communication, Know how to work in teams	253
Listen to the voice of wisdom, Tolerate ambiguity	254
Encourage themselves, Accept responsibility	255
Organizational Structure	255
Centralization, Board of directors	255
Decentralization, Information Sharing	256
Contingent Rewards, Teams	257
Alignment, The learning link	258
12. Project Management	260-287
Evolution	261
Definitions	262
The Project Manager	262
The Traditional Triple Constraints	264
Time	264
Cost, Scope, Project Management activities	265
Project Objectives, Project Management artifacts	266
Project control variables	267
Approaches	268
Agile Unified Process, Temporary organization sequencing concepts	269
Critical chain, Program Evaluation and Review Technique (PERT)	269
Event chain methodology	270
Process-based management	271
Capability Maturity Model Integration	271
Gantt chart	271
Advantages and limitations of Gantt chart	272
Project systems, Project control systems	273
Project development stages, Initiation	275

Planning and design, Closing and Maintenance	275
Project accounting	276
Project workforce management	277
Software project management, Project Planning	277
Project Monitoring and Control	279
Software requirements, Risk Management, Software Process	279
Problems in Software Projects, Software development process	279
Process activities/steps	280
Project governance	281
Elements	282
Project management software	283
Tasks of project management software	284
Scheduling, Calculating critical path, Providing information	284
Approaches to project management software, Desktop	284
Web-based, Personal	285
Single user, Collaborative, Integrated	285
Non-specialised tools	286
Limitations of project management software	286
13. Material Management	299-303
Areas of Concentration, Acquisition, Quality Control	289
Standards, Supply chain	290
Supply chain management	292
Supply chain management problems, Activities/functions	293
Strategic, Tactical	294
Operational	295
Supply chain business process integration	296
Customer service management process	297
Procurement process	297
Product development and commercialization	298
Manufacturing flow management process	298
Physical distribution	298
Outsourcing/partnerships	298
Performance measurement	299
Supply chain management components integration	299
Supply Chain Management Software	301
14. Disaster and Business Continuity Management	304-318
Phases and professional activities	305
Mitigation, Preparedness	306
Response	307
Recovery, Personal activities	308
The Emergency Management Profession	310
Tools, International organisations	310

Business continuity planning, Introduction	311
Analysis, Impact analysis	312
Threat analysis, Definition of impact scenarios	313
Recovery requirement documentation	314
Solution design, Implementation	315
Testing and organizational acceptance	315
Maintenance	316
Information update and testing	316
Testing and verification of technical solutions	316
Testing and verification of organization recovery procedures	316

[PART-V]

15. Computer Application	319-333
Computer hardware	322
Computer software	322
Relationship to computer hardware	322
Data processing	324
Types of software	326
Program and library, Three layers	326
Platform software, Application software	327
User-written software, Operation	327
Quality and reliability	328
Application software	330
Application software classification	331
Enterprise software or Business software	331
Enterprise-level application	332
Types of enterprise software	332
16. Information Technology	334-375
Information technology today	336
Data management	336
Database, Evolution	337
Applications of databases	339
Database management system	339
Query ability	341
Backup and replication	341
Rule enforcement, Security	341
Computation, Change and access logging	342
Automated optimization	342
Meta-data repository, Relational DBMS	342
SQL DBMS	344
Accounting software	344
Modules	345
Core Modules	345

Non Core Modules	345
Categories of accounting software	345
Personal Accounting	345
Quantitative Analysis Software (Finance)	347
E-accounting	347
Uses, Benefits	348
Database administration and automation	349
Types of database administration	349
Nature of database administration	349
Database administration tools	350
IT automation and impact on database administration	350
Information security	351
Basic principles of Information Security	351
Confidentiality	351
Integrity, Availability	353
Risk management	353
Three types of controls	355
Security classification for information	356
Access control	356
Cryptography, Defense in depth	358
Information security as a process	359
Change management	360
Information technology governance	362
Definitions, Background	363
Relationship to other IT disciplines	364
IT asset management, Software asset management	364
Hardware asset management	365
Role of IT asset management in an organization	365
Goals of ITAM, Process	365
IT portfolio management	365
IT Service Management	366
Document management system	368
Components of Document Management	368
Metadata, Integration	368
Capture, Indexing, Storage, Retrieval	369
Learning management system, LMS vs LCMS	370
Characteristics, Virtual learning environment	371
Main software for business organisations	373
17. E-commerce	376-400
Evolution	377
Success factors in e-commerce	378
Technical and organizational aspects	379

Customer-Oriented	380
Problems	380
Product suitability	383
Acceptance	384
Internet marketing	385
Definition and scope	385
Evolution	385
Business models	386
Benefits	386
Limitations	387
Security concerns	387
Effects on industries	388
Online transaction processing	388
Uses	388
Requirements	389
Benefits	389
Disadvantages	389
Online banking	389
Features	390
Security	390
Fraud	391
Electronic funds transfer	391
Card-based EFT	391
Transaction types	392
Authorization	392
Authentication	393
E-Trading, Background	393
Impact	394
Technology & systems	395
Shopping cart software	396
Technical definition, Components	396
Licensed vs. Hosted Shopping Carts	397
WebMoney	397
PayPal	398
Appendix: Top Business Organisation.....	401-424
- The Coca-Cola Company	402
- IBM (International Business Machine)	407
- Mittal Steel Company	411
- WAL-MART	413
- Reliance Industries Ltd.	419
- Mc-Donald	421
