

Preface

As we all know that Computer Science is broadly divided into two branches namely Computer Hardware and Computer Software. This book is completely dedicated to Computer Hardware. It contains intense knowledge about Processor, Motherboard, Power Supply, RAM, Hard Disk, Optical Disk, Computer Display system, Printer, Sound Card, etc. Beside this, from Computer Assembling and the hardware used in computer assembling to the problems related to the Operating System with their remedies, all important details have been presented in this book. With its help you will be able to know all those aspects of hardware which, one usually gets only after long experience.

In India, most of the computer hardware training institutes impart training for assembling and maintenance of computer and networking in their courses which is synonymous to today's employment opportunities in this field. In this book you will find detailed description on all these subjects. A VCD containing a Video Film is being provided free with this book. This film can be watched on your computer or even with a VCD Player. You can get to know the introduction of computer hardware and its peripherals, computer assembling, computer networking and maintenance of computers from this film. You can easily learn to assemble computer and networking procedures from it.

In our country, this is the first attempt of its kind to provide a video film (VCD) with a book. The purpose is to save the students from those hardware training institutes who ditch the students only for the sake of their own business gains and make mockery of computer education; students spoil their money and valuable time by enrolling in such spurious institutes. You can learn yourself from this book and VCD that should be taught in such institutes. It is trusted that this our endeavour will prove to be quite helpful for building a new career and bright future for all students.

Contents

PC Assembling color pages	i-viii
1. Electronics Introduction	1-6
Electronic devices and components	2
Types of circuits	2
Digital electronics	6
2. Computer Introduction	7-10
Control unit	8
Arithmetic/logic unit (ALU)	8
Memory	8
Input/output (I/O)	8
PC Hardware	9
3. Microprocessor (CPU)	11-18
CPU operation	11
CPU socket	13
Pentium Processor	15
Pentium II Processor	16
Pentium III	16
Pentium 4	16
Pentium D	17
Intel Pentium Dual-Core	17
Intel Core 2	18
Athlon 64 X2	18
4. Motherboards	19-36
Northbridge	21
Southbridge	22
Functionality	22
Components and functions	23
Integrated peripherals	24
Bootstrapping using the BIOS	24

Form factors	25
PC/104 and EBX	27
Nvidia SLI and ATI Crossfire	27
Data Bus	28
Description of a Bus	28
Bus topology	29
Parallel internal computer buses	29
Serial internal computer buses	32
Parallel external computer buses	33
Serial external computer buses	34
Address bus	35
Control bus	36
Front side bus (FSB)	36
5. Switch Mode Power Supply	37-46
Input rectifier stage	39
Inverter stage	40
Voltage converter and output rectifier	40
Regulation	40
Transformer Design	41
Power factor	41
Computer Power Supply	41
Power rating	42
Connectors	43
Laptops SMPS	44
Wiring diagrams	44
Modular power supplies	44
Small facts to consider	45
Troubleshooting	46
6. BIOS (Basic Input Output System)	47-50
How the BIOS boots?	48
The BIOS Chip and BIOS Recovery	49
Firmware on adapter cards	49
BIOS boot specification	50
7. RAM (Random Access Memory)	51-60
Types of RAM	51
DRAM	52
Principle of operation	52
Common DRAM modules	55
Variations	56
DIMM (Dual in-line memory module)	59
Speeds	59
Form factors	60

8. Hard Disk Drive	61-74
Measuring the Speed of a Hard Disk	62
Maximum Transfer Rate	62
Spindle Rotation Speed	62
Seek Time	63
Disk Fragmentation	63
Connection Types	63
HDD Technology	63
Architecture	66
Capacity and access speed	67
Capacity measurements	67
Form factors	68
Access and interfaces	69
Disk interface families	70
Integrity	72
Landing zones and load/unload technology	73
Disk failures and their metrics	74
9. Optical Drives	75-84
Laser and optics	76
Rotational mechanism	77
Loading mechanisms	78
Computer interfaces	79
Recording performance	79
Optical disc recording technologies	80
Types of recordable optical disc	80
Recording modes	81
Overburning	81
Compact Disc (CD)	81
Physical details	82
DVD (Digital Versatile Disc)	82
DVD Technology	83
Dual layer recording	83
Recordable formats	83
Non-recordable formats	84
10. Computer Display	85-94
Computer monitor	85
Cathode ray tube (CRT Monitor)	86
Liquid crystal display (LCD Monitor)	87
Video Graphics Array (VGA Technology)	90
Super Video Graphics Array (SVGA)	90
PCI Express	91
Accelerated Graphics Port (AGP Display)	91
Video memory (VRAM)	91
3D display	92
Plasma display	92

Advantages	94
Disadvantages	94
11. Computer Printers	95-106
Laser printer	95
How it works?	96
Multiple steps occurring at once	99
Laser printer maintenance	99
Thermal Ink Jet	100
12. Sound Cards	107-114
Characteristics	107
Sound channels and polyphony	108
Sound Blaster	110
Connectors	111
Professional soundcards (audio interfaces)	111
Integrated sound hardware on PC motherboards	112
Integrated sound on other platforms	113
USB sound "cards"	113
Driver architecture	113
13. Introduction of Operating System	115-118
Interrupts	116
Memory Management	116
Multitasking	117
Disk Access and File Systems	117
Networking	117
Graphical user interfaces	118
Microsoft Windows	118
DOS (Disk operating system)	118
14. Assemble a PC	119-142
Materials Required	119
Required Environment	120
Precautions	120
Installing Motherboard	121
Motherboard Layout	121
CPU Installation	123
Installation of CPU Fan and Heatsink	123
Installation of Memory Modules (DIMM)	123
Installing a DIMM	124
Jumpers Setup	124
Onboard Headers and Connectors	125
Serial ATA (SATA) Hard Disks Installation	125
Expansion Cards	126
Floppy Drive (Optional)	126
Installing Hardisk	127
Installing Optical Drive (DVD/CDROM)	128

Power Supply	128
Final Connections in the Cabinet	129
Closing the Cabinet	129
Connecting other peripherals	130
Power Cables	130
Powering the System	130
Configurations	130
BIOS SETUP UTILITY	130
BIOS Menu Bar	131
Main Screen	131
Advanced Screen	132
CPU Configuration in BIOS Setup Menu	132
CPU Host Frequency	133
Boot Failure Guard	133
Spread Spectrum	133
Ratio Status	133
Chipset Configuration	133
ACPI Configuration	135
Restore on AC/Power Loss	135
IDE Configuration	136
IDE Device Configuration	137
PCIPnP Configuration	138
Super IO Configuration	139
USB Configuration	140
Boot Screen	140
Exit Screen	141
Install Operating System	142
15. OS Installation (Windows XP)	143-150
Hardware Requirements	143
Checking Hardware and Software Compatibility	144
Obtaining Network Information	144
Backing Up Your Files	144
Upgrading vs. Installing a New Copy	145
Running Windows XP Setup	145
If You're Installing a New Copy (Clean Install)	145
To install a new copy by using the CD	146
To install a new copy by using a network connection	146
If You're Upgrading	146
To upgrade from the CD	146
To upgrade from a network connection	147
Collecting User and Computer Information	147
Providing Networking Information	148
Joining a Workgroup	148
Joining a Domain	148
Customizing Setup Using Unattended Setup Mode	149

Starting Windows XP Professional	149
Logging on to Windows XP Professional	149
Creating a User Account	150
To create a user account	150
Install Multiple-Boot Configuration	150
16. OS Installation (Windows Vista)	151-154
Windows Vista Home Basic	151
Windows Vista Home Premium, Business, Enterprise, and Vista Ultimate	151
Prepare to install Windows Vista on a computer that is running Windows XP	152
Vista Activation	154
17. Operating Windows Vista	155-198
The Desktop	155
Where did my desktop go?	156
Working with desktop icons	156
Adding and removing icons from the desktop	157
To add a shortcut to the desktop	157
To add or remove common desktop icons	158
To move a file from a folder to the desktop	159
To remove an icon from the desktop	159
Moving icons around	159
Selecting multiple icons	159
Hiding desktop icons	160
The Recycle Bin	160
Recover files from the Recycle Bin	160
Permanently delete files from the Recycle Bin	161
Change the Recycle Bin settings	161
To change how the Recycle Bin looks	162
Picking a desktop background	162
To change the desktop background	162
Desktop tips and tricks	163
Move program shortcuts to the Quick Launch toolbar	163
Add or remove the Quick Launch toolbar	163
To show and hide icons on the Quick Launch toolbar	163
To show and hide icons in the notification area	164
Add or remove programs on the taskbar	164
To add a program to the Quick Launch toolbar	164
To remove a program from the Quick Launch toolbar or notification area	164
Customize the taskbar	165
To hide the taskbar	165
To show the taskbar	166
To lock or unlock the taskbar	166
To move the taskbar	166
To resize the taskbar	166
To stop grouping similar taskbar buttons on the taskbar	166
To show or hide icons in the notification area	166

To add a toolbar to the taskbar	167
To add or remove the Quick Launch toolbar	167
To show or hide icons in the Quick Launch toolbar	167
To add a program to the Quick Launch toolbar	167
To remove a program from the Quick Launch toolbar	167
Organize files and programs on the Start menu	167
To pin a program icon to the Start menu	168
To find recent items on the Start menu	168
Add or remove Recent Items on the Start menu	168
Open the Taskbar and Start Menu Properties	169
To remove a program icon from the Start menu	169
To move the Start button	169
To clear recent items from the Start menu	169
To adjust the number of shortcuts for frequently used programs	170
To customize the right pane of the Start menu	170
To restore Start menu default settings	171
To search for programs from the Start menu	171
To add the Run command to the Start menu	171
Change the Start menu to Classic view	171
Choose a picture for your user account and Start menu	171
Don't store files on the desktop	172
Create or delete a shortcut	172
To create a shortcut	172
To delete a shortcut	172
The Start menu	172
Opening programs from the Start menu	174
The Search box	175
What's in the right pane?	176
The taskbar	177
Minimize and restore windows	178
How the taskbar groups similar items	179
The Quick Launch toolbar	180
The notification area	181
Windows Sidebar and gadgets	181
Why use Sidebar?	182
To keep windows from covering Sidebar	182
Getting started with gadgets	182
How does the Clock work?	182
How does Slide Show work?	183
To change the slide show pictures	183
Which gadgets do I have?	183
Adding and removing gadgets	184
To add a gadget to Sidebar	184
To remove a gadget from Sidebar	184
Organizing gadgets	184
To place a gadget on the desktop	184

To close Sidebar	185
Working with windows	185
Moving a window	186
Changing the size of a window	186
Hiding a window	186
Closing a window	187
Switching between windows	187
Arranging windows automatically	189
Dialog boxes	189
Using menus, buttons, bars, and boxes	190
Using menus	190
Using scroll bars	191
Using command buttons	192
Using option buttons	193
Using check boxes	193
Using sliders	194
Turning off your computer properly	194
Use the Power button on the Start menu	194
Why your Power button might look different	195
When to shut down	195
Change the size of virtual memory	196
What is virtual memory?	196
Virtual memory and error messages	196
What is the Windows Experience Index?	196
Computer's base score	197
Computer's subscore	198
18. Linux Installation	199-204
Choosing a Linux distribution	200
Installation Process	200
The Graphical Installer	202
Using the graphical installer	202
Troubleshooting the Installation Process	202
System Freeze During the PCMCIA Configuration Phase	203
System Freeze while Loading USB Modules	204
Interpreting the Kernel Startup Messages	204
Reporting Installation Problems	204
19. System Setting	205-238
BIOS Post Screen	205
BIOS Setting	206
BIOS Updates	206
Firmware Updates	206
IRQs	207
Disable unused devices	207

Move conflicting devices	208
Disabling ACPI	208
Driver installation	209
Driver installation order	209
Installing non-executable drivers	214
Memory Optimization	215
CPU L1 and L2 cache	215
Physical RAM	216
RAM size	216
RAM speed	216
RAM timings	217
Video RAM	217
Windows Memory Management Settings	218
Disk cache	218
ICON Cache	218
Virtual Memory	218
Clearing the pagefile	219
Setting the pagefile - Partitions	219
Drive Optimization	221
Windows disk indexing	221
Windows disk defragmenter	222
Background defragmentation	222
Advanced defragmentation	222
PageDefrag	223
Boot Optimization	223
Bootvis	224
Analyzing system startup	224
Optimizing system startup	224
SYSTEM Properties	225
Computer name	225
Hardware	225
Device manager	225
Optimize drives	226
Remove unused devices	227
User Profiles Settings	229
Startup and Recovery Settings	229
Environment Variables	230
Error Reporting	230
System Restore	230
Windows Firewall	230
System Configuration Utility	231
System.ini & Win.ini	231
Boot.ini	232

Startup	232
Cleaning Windows	234
Disk Cleanup	234
Manual drive cleaning	235
Windows Registry	236
Compacting the registry	236
Cleaning the registry	236
Registry Editor	236
Editing existing entries	237
Creative new registry entries	237
Backing up portions of the registry	238
Restoring sections of the registry	238

20. Computer Networking 239-260

Area Networks	239
LAN Basics	240
WAN Basics	240
MAN, SAN, PAN, DAN, and CAN	240
Network topology	241
Networking in Windows Vista	242
Network technologies	242
Wireless	242
Ethernet	243
HPNA	244
Hardware requirements	244
Setup a Network	247
Install the hardware	247
Set up or verify an Internet connection (optional)	247
Connect the computers	248
Ethernet networks	248
Wireless networks	249
HPNA networks	249
Run the Set Up a Wireless Router or Access Point wizard	249
Enable sharing on your network	249
Test your network	249
Changing TCP/IP settings	250
Add or remove a network protocol, service, or client	251
Add a device or computer to a network	253
To add a wireless computer running Windows Vista / XP by using a USB flash drive	253
To manually add a wireless computer running Windows XP	253
To add a wired (Ethernet) computer running Windows Vista	254
To add a wired (Ethernet) computer running Windows XP	255
To add a wireless device	255

To add a wired device	255
To add a printer	255
To add a Bluetooth enabled device	256
Troubleshoot problems finding computers on a network	256
I don't see any computers or devices in the Network folder	256
I don't see a computer or device that I expect to see in the Network folder.	257
To check / change the workgroup name on a computer with Windows XP	257
To check or change the workgroup name on a computer running Vista	257
To change a network location type	258
Making your network more secure	258
Use a firewall	258
Allow a program to communicate through Windows Firewall	259
Open a port in Windows Firewall	259
Run antivirus software on each computer	260
Use a router to share an Internet connection	260
21. PC Troubleshooting	261-360
Computer is telling me my C drive is full or out of space.	261
Should my computer fans be sucking or blowing?	263
What is the 1 by the jumper or how do I locate pin 1?	263
My jumpers don't have any pins only solid beads.	264
Only plastic cover comes off when removing a jumper.	264
How to move, remove, adjust jumpers and dip switches.	264
How does a computer get infected with a virus or spyware?	265
How can I fix an IP conflict?	266
How can I remotely shutdown another Windows computer?	266
Is there a way to tell how hot my CPU is running?	267
Sector not found error	267
When installing a new hard drive, does it matter if jumpers are assigned?	268
I have problems in Windows after installing new software.	268
CD-ROM software no longer works after adding hard drive.	268
Is there a USB to serial or serial to USB adapter?	269
How do I fix Illegal Operations?	269
Error SU358 during setup of program.	272
Exclamation mark on PCI to ISA bridge in Windows.	272
Determining how much RAM is installed and available.	272
Receive blinking cursor when resuming from standby mode.	272
CD-ROM drive light blinks every few seconds.	273
How can I assign a Domain for my NT Server 4.0?	273
How many servers are required to setup a Domain?	273
Cannot see HPFS in Windows NT 4.0.	274
How many processors does Windows 2000 support	274
Lost or forgotten Windows NT / 2000 / XP password.	274

Multiple display Windows 2000 troubleshooting steps.	275
My computer is running slow what steps can I do to fix it?	275
I'm getting Bad Sectors, Clusters, and/or Missing Allocations what should I do?	277
Missing Operating System.	277
hard disk drive is only being seen as 504, 528, or 540MB	278
Unable to disable Write Precomp within CMOS is there another way?	278
Receiving S.M.A.R.T. status bad backup and replace error.	279
No ROM basic system halted error.	279
Windows NT / 2000 installation is very slow.	280
How to enter the BIOS or CMOS setup.	280
My monitor shifts when changing the resolution.	281
Is it possible to have two video cards in one computer?	281
Low audio everywhere.	281
Poor audio e.g. scratchy sound.	282
Loud pop or crack when turning on computer.	283
When the computer boots I see 'Bad Command or File name'.	283
Receive error when CD is put in computer.	284
Verifying the CD-ROM cables are correctly connected.	285
CD/DVD Tray not opening.	286
Getting no sound from audio CDs.	288
How to or can't boot from a CD or DVD.	288
Can CD-ROM drives be mounted vertically?	290
How to fix an invalid page fault.	290
How to fix a fatal exception error?	291
How to fix a general protection fault.	294
Insufficient memory error when formatting hard drive.	296
Invalid Media Type reading drive C	296
Error BIOS ROM CHECKSUM - SYSTEM HALTED.	298
When booting computer I receive several beeps.	298
How to clear an unknown BIOS password.	299
CMOS checksum error.	300
Prompt to enter CMOS when booting computer.	301
How to replace the CMOS battery.	301
No display on monitor.	303
Troubleshooting a new serial device.	305
General printer troubleshooting.	305
Setting up or installing a printer in Microsoft Windows.	307
Setup the printer as default in Windows 9x / NT / 2000 / ME / XP.	309
Mouse acting erratically and/or is not moving properly.	309
Mouse not being detected in Windows 9x, ME, 2000, XP, or Vista.	310
Receive error 'Too many parameters'.	311
Troubleshooting on-board audio.	312

Ensuring the modem is connected properly.	312
General microphone troubleshooting.	313
Unable to run or error with downloaded file.	314
How to determine the APM version.	315
If a device is removed in Device Manager will it be redetect?	315
General Windows 98 / ME USB troubleshooting.	316
Prompt to press F1/F2 each time computer boots.	317
Keyboard error at boot.	317
Not all keys on keyboard work.	318
Determining the AGP version.	318
Computer does not turn off.	319
No power or computer does not turn on.	319
What should my power supply be set to?	321
Black borders on side of screen.	321
Dead or black pixels	323
No fixed disk present	324
How to delete a partition using fdisk.	325
How to create a partition using fdisk.	326
Fdisk freezes during creation / deletion of partition	326
Cannot Delete File: File System Error (1026).	327
CD-ROM only detects audio CDs	327
Spool 32 printer error.	328
Lost system resources.	330
Out of memory errors.	330
Memory parity errors.	332
Error reading/writing fixed disk.	333
Runtime errors.	333
A serious disk error occurred trying to read/write drive.	339
CMOS memory size mismatch.	339
Time and date getting reset and/or losing time.	340
Disk boot failure.	341
Fixed disk failure.	342
Computer does not detect all new memory.	343
How many partitions can DOS / Windows recognize.	344
General scanner troubleshooting.	345
Basic network troubleshooting.	346
Hard disk controller failure.	348
How do I map a network drive?	350
Computer stops at verifying dmi pool data.	351
How do I determine what type of network card I have?	352
Windows restarts without warning.	353
Post troubleshooting steps.	355
Unmountable boot volume in Windows XP.	357
How to make a network cable.	358
Windows freezes or stops responding frequently.	359
