

Preface

The biggest change that has occurred with changing technology is – the ‘size’ of computer. Computer shrunk into a desktop PC which once was of size of a room, has now become even smaller as ‘Laptop’ or ‘Notebook’. These computers getting smaller in size by the day are no less in their power and features. In the last two years, the prices of Laptops and Notebooks have come down sharply due to which their sales have increased multi-fold. From the point-of-view of ‘technology’, there is no difference between a Laptop computer and a Desktop computer, the difference is only in the size. Just as we have Input unit, Processing unit and Output unit in a desktop computer, similarly we have these three units in Laptop and Notebook. Single Board technology is used in Laptops and Notebooks just to keep the size to minimum, whereas Motherboard and Daughterboard concept is used in desktop computers. When Laptop computers started to become common, LCD monitor directly connected with Motherboard was used in place of CRT monitors as its Display unit. Today, LCD monitors are used with Desktop computers also, but it is connected with Video Card fitted in the CPU.

As the use of Laptops and Notebooks are becoming more common, the complaints in them are on increase. This book is meant for this very purpose as ‘How to repair your Laptop and Notebook’ if it develops some problem. Hardware technology used for Laptops and Notebooks is described in details in this book so that you can understand its various components and how to replace them or how to repair them. If you want to up-grade your Laptop, you need to have good technical knowledge. Presently Windows 7 / 8 is being used as Operating System in Laptops and Notebooks. You can study this Operating System with respect to Laptops from this book and learn process of Installation and Networking to achieve results. To learn Laptop and Notebook technique conveniently, a DVD is provided alongwith this book which contains Laptop repairing and Up-grading Video, as also some Utility software which can be used in troubleshooting of Laptop and for data recovery, etc.

Your valuable suggestions are welcome for further improvement of the book in next editions.

- **Author**

9. Dell Laptops: Repairing and Upgrading	131-168
Disassemble Dell Inspiron 1440 laptop	144
Fix damaged screen hinge in Dell Inspiron E1705 laptop	157
Replaced LCD screen or inverter in Dell Inspiron laptops	160
Remove hard drive from Dell Inspiron Mini 10 netbook	166
10. HP & Compaq Laptops: Repairing and Upgrading	169-193
Remove LCD screen from HP Pavilion laptop	169
How to take apart HP Pavilion laptop?	172
Disassemble Compaq Presario v6000 laptop	183
11. Installing MS Windows 7 in Laptop	194-236
Installing and reinstalling Windows	194
Working with Control Panel	202
Customize a theme	203
Personalizing your computer, Themes	205
Change your desktop background (wallpaper)	206
Create a desktop background slide show	207
Make changes to your desktop background slide show	209
Change screen resolution	214
Add or delete desktop icons	215
Adjust your monitor's brightness and contrast	219
Ways to improve display quality	221
Conserving battery power	224
Solutions to common power problems	232
Solutions to common battery problems	235
12. Laptop Hard Disk Drive and Memory Management	237-253
Convert a hard disk or partition to NTFS format	237
Convert a hard disk or partition to FAT32 format	239
Create a boot partition	241
Ways to improve your computer's performance	244
Advanced tools	244
Improve performance by defragmenting your hard disk	247
Start Disk Cleanup	248
What is virtual memory?	249
Diagnosing memory problems on your computer	252
13. Operating System Troubleshooting	254-274
Using System Configuration	255
General, Boot	256
Start System Configuration	260
What is safe mode?	261
Advanced startup options (including safe mode)	261
Repair Your Computer	261
Troubleshooting problems while in safe mode	262
Troubleshooting in Windows	263
Ways to improve display quality	264
Turn off automatic resizing in programs that aren't designed for high-DPI display	265
What is System Information?	267
Why won't Windows allow me to change a system setting?	267
What is the Microsoft Support Diagnostic Tool?	267

How does Action Center check for problems?	268
Find your computer's processor speed	270
What is the Microsoft Management Console (MMC)?	271
How much storage space do I need to back up files?	272
How do I view the contents of my backup?	273
How do I restore files?	273
Can I recover files that I have accidentally deleted?	273
How do I get my files back if my computer stops working?	273
Create a restore point	273
What is System Restore?	274
14. Networking among Laptops	275-317
Set up a network	276
Wireless networks, Ethernet	278
HomePNA, Powerline	279
Set up a wireless router	281
Connect computers to the network, Set up a broadband (DSL or cable) connection	283
View and connect to available wireless networks	300
Choosing a network location	300
Connecting Windows 7 to an iSCSI SAN	304
Windows 7 Network and Sharing Center	310
Fix a network problem	313
Wireless Network Security in Windows 7	314
15. Laptops: General Troubleshooting	318-384
Laptop is telling me my C drive is full or out of space.	318
Should my Laptop fans be sucking or blowing?	320
How does a Laptop get infected with a virus or spyware?	320
How can I fix an IP conflict?	321
Sector not found error	322
I have problems in Windows after installing new software.	322
Is there a USB to serial or serial to USB adapter?	323
How do I fix Illegal Operations?	323
Determining how much RAM is installed and available.	326
Receive blinking cursor when resuming from standby mode.	326
DVD drive light blinks every few seconds.	326
My Laptop is running slow what steps can I do to fix it?	328
Missing Operating System.	330
Receiving S.M.A.R.T. status bad backup and replace error.	331
No ROM basic system halted error.	331
How to enter the BIOS or CMOS setup.	332
My monitor shifts when changing the resolution.	332
Is it possible to have two video cards in one Laptop?	333
Low audio everywhere.	333
When the Laptop boots I see 'Bad Command or File name'.	335
Receive error when CD is put in Laptop.	335
CD/DVD Tray not opening	337
Getting no sound from audio CDs	338
How to or can't boot from a CD or DVD	339
How to fix an invalid page fault.	340

How to fix a fatal exception error?	341
How to fix a general protection fault.	344
Insufficient memory error when formatting hard drive.	346
Invalid Media Type reading drive C	347
Error BIOS ROM CHECKSUM - SYSTEM HALTED	348
When booting Laptop I receive several beeps	348
How to clear an unknown BIOS password	349
CMOS checksum error	350
Prompt to enter CMOS when booting Laptop	351
How to replace the CMOS battery.	352
General printer troubleshooting.	354
Setting up or installing a printer in Microsoft Windows.	356
Troubleshooting on-board audio.	357
General microphone troubleshooting.	358
Unable to run or error with downloaded file.	358
Prompt to press F1/F2 each time Laptop boots	361
Keyboard error at boot	362
Laptop does not turn off	363
No power or Laptop does not turn on	363
Dead or black pixels	365
No fixed disk present	366
How to delete a partition using fdisk.	367
How to create a partition using fdisk.	368
Fdisk freezes during creation / deletion of partition	368
Cannot Delete File: File System Error (1026).	369
CD-ROM only detects audio CDs	369
Spool 32 printer error.	370
A serious disk error occurred trying to read/write drive	375
CMOS memory size mismatch.	376
Disk boot failure.	376
Fixed disk failure	377
Laptop does not detect all new memory.	378
Basic network troubleshooting	379
Hard disk controller failure	382
How do I map a network drive?	383
Laptop stops at verifying dmi pool data.	384

[Microsoft Windows 8]

16. MS Windows 8: —An Introduction	385-411
17. Installing and Upgrading to MS Windows 8	412-427
18. Connecting to a Network and Internet	428-443
19. Using SkyDrive	444-451
20. Troubleshooting Problems	452-465
Appendix: Glossary	466-472
