

Preface

Ours is a fast developing country, but due to a large population, the problems being faced by us are of much bigger magnitude in comparison to other developing countries. One of the biggest problems is that of un-employment. Since we have a much larger man-power, it can prove to be a boon for us if we convert it into a technical man-power with the help of computers. Desktop publishing (DTP) is one of the most widely used phenomena in the field of computers. It has given opportunities to a large number of youth in our country to get employment as well as self employment in this field.

Since Computer Hardware and Software are now-a-days available at comparatively very low price, in such scenario, if you have knowledge of some main DTP softwares such as Windows, PageMaker, Adobe In-Design, CorelDraw, Illustrator, Photoshop etc, you can easily earn Rs. 25000/- to Rs. 50000/- with an initial investment of approximately Rs. 100,000/-.

With the help of this DTP Course, readers can learn simple techniques of latest versions of main DTP packages viz. Windows 7 / 10, PageMaker, In-Design, CorelDraw, Illustrator, and PhotoShop. It presents step-by-step details with actual software pictures to enable readers understand the execution of commands easily and quickly. This book is conceived and created in such a way so that users can use it without any outside guidance.

It is sincerely hoped that readers will find this book a useful asset in achieving their goals of successful career in the field of Desk Top Publishing.

-Authors

Contents

1. DTP (Desktop Publishing) -An Introduction	1-12
DTP Hardware and Software	2
Printers and Scanners	3
Main elements of DTP, CMYK, RGB and Spot Colour	4
Pixels and Bitmaps	5
Vectorised Graphics, Image output and Resolution	6
Overprinting, Colour Gamut, The Colour Wheel	8
DTP terminology	9
Assignment Test Solved (Multiple Choice Questions/Answers)	11-12

Operating Systems

2. Microsoft Windows 7	13-43
Introduction to GUI Operating System, Features new to Windows 7, Desktop Themes	14
Libraries, Miscellaneous shell enhancements, Start menu enhancements, Taskbar enhancements	15
Pinned applications, Thumbnail previews, Jump list	16
Notification area, Aero Peek, Taskbar	17
Font management, Devices and Printers, DirectX, The desktop of Windows 7	18
Working with desktop icons, Adding and removing icons, Add a shortcut to the desktop	19
Hiding desktop icons, The Recycle Bin, The Start menu, Getting started with the Start menu	20
The search box, Start Menu Right Pane, Shut down button, Customize the Start menu, The taskbar	21
Working with Windows, Minimize and restore windows	22
How does Slide Show work?, Adding and removing gadgets, Organizing gadgets, Using with windows, Parts of a window ...	24
Switching between windows, Arranging windows automatically, Arranging windows using Snap, Dialog boxes	26
Using menus, buttons, bars, and boxes, Using menus, Using scroll bars, Using command buttons	27
Change your desktop background, Change Windows fonts, Change screen resolution	30
Add or delete desktop icons, Show, hide, or resize desktop icons	31
Customize a theme, Opening a program, Using commands in programs	32
Exiting a program, Installing or uninstalling programs, Uninstall or change a program, Install a program	33
Turn off My Computer, Turning off your computer properly, Using sleep	34
Repair Your Computer, Safe Mode, Safe Mode with Networking, Safe Mode with Command Prompt	35
Disable Driver Signature Enforcement, Start Windows Normally, What is System Restore?	36
Assignment Test Solved (Multiple Choice Questions/Answers)	40-43
3. Microsoft Windows 10	44-78
MS Windows 10 An Introduction, Upgrade to Windows 10 From Windows 7	44
Change Windows 10 Settings, Create a Restore Point	46
Disable the Lock Screen, Change Your Default Browser	49
Change the Default Font in Windows 10, Change Desktop Background	54
Change the Size of the Taskbar Icons, Change the Icons size of File Explorer	56
Clean Install of Windows 10, Uninstall Windows 10	60
Copy and Paste in the Command Prompt, Using Windows 10	62
Quick Actions of Windows 10, Cloud in Windows 10, Using OneDrive	67
Universal Apps of Windows 10, Security of Windows 10, User Account Control, Windows Defender	68
Windows Firewall, Using Applications in Windows 10, Web browsing	69
Networking in Windows 10, Wired Connection (Ethernet), Wireless Connection (Wi-Fi)	70
Remote Access in Windows 10, Backup and Recovery in Windows 10, Creating System Image	72
Resetting the PC, Uninstalling Applications, Uninstalling from the Start Menu, Uninstalling from the Setting window	73
Uninstalling from the Contrl Panel, E-mail Management, Configuring the Mail App	74
Assignment Test Solved (Multiple Choice Questions/Answers)	77-78

Adobe PageMaker 7

4. Adobe PageMaker 7: Interface Introduction	79-97
Introduction to PageMaker, The Toolbox, Working with palettes	80
Viewing pages, Choosing preset page views, Using Zoom tool	81
Scrolling within a window, Text and Graphics, Selecting objects, Understanding text objects	82

Identifying a text object, Selecting text with the text tool, Editing text	82
Moving between pages, Adding and deleting pages	83
Managing story windows, Tiling and cascading windows, Creating and opening publications	84
Creating a publication from scratch, Opening an existing publication	85
Saving linked and associated files, Saving a file for earlier versions, Closing a publication, Setting up pages	86
Setting margins, Setting print-related Setup options, Changing Document Setup options, Master pages	87
Applying master pages, Applying a different master to existing, Invisible grid defined by rulers	89
Working with nonprinting guides, Setting up column guides	91
Moving and locking columns, Page with different column setups	92
Customizing guides, Managing grids, Numbering pages	94
Previewing the running header/footer	95
Assignment Test Solved (Multiple Choice Questions/Answers)	96-97
5. Text and Layout Processing	98-120
Working with Text, Creating text blocks, Creating text frames, Comparing text frames and text blocks	99
Selecting text or text objects, Importing text, Placing text on a page, Understanding text objects and stories	100
Working with window shades, Threading text blocks, Threading text frames, Moving between text frames	102
Cutting, copying, and pasting text, Setting text preferences, Formatting text	104
Formatting paragraphs, Setting indents and tabs, Creating a hanging indent	110
Adding space above/below paragraphs, Using paragraph styles, Creating and editing paragraph styles	112
Applying a style to a paragraph, Understanding tracking and kerning, Tracking type, Editing tracks	114
Copying tracks to another font, Proofing tracked text, Kerning type, Hyphenation and justification	116
Aligning paragraphs, Selecting a leading value	117
Finding and changing text attributes	118
Checking spelling	119
Assignment Test Solved (Multiple Choice Questions/Answers)	120
6. Working with Objects	121-134
Drawing tools, Using the drawing tools	121
Changing strokes and fills, Changing the shape of objects	122
Using frames, Frames, text blocks, and drawn objects, Creating a frame	123
Changing the stacking order of objects, Deleting an object, Object Manipulation by Control palette, Control palette basics ..	126
Using the reference-point Proxy, Modifying objects by adjusting values, Measurement and nudge preferences	127
Grouping and ungrouping objects, Aligning and distributing objects	129
Wrapping text around graphics, Attaching a graphic to text	131
Photoshop Effect, Compress-decompress a TIFF image, Viewing images at different resolutions	133
Assignment Test Solved (Multiple Choice Questions/Answers)	134
7. Printing and Color Separation	135-156
Printing a Publication, General document printing options	135
Printing fonts on PostScript printers, PostScript Printer Description files, Updating a PPD file, Creating a custom PPD	138
Preserving EPS colors, Missing fonts in imported PostScript	139
Determining how bitmap images print, Printing proofs on a desktop printer	140
Printing proofs without graphics, Printing thumbnail proofs, Printing reader's spreads	141
Custom paper size for PS imagesetters, Film preparation, Color Printing	142
Producing color separations, Removing unused colors and inks, Proofing color separations	144
Handing a service provider, Using the Service Provider plug-in	146
Selecting a data encoding option(PS), Saving a publication as a PS file	147
Saving print settings with printer styles	148
Printing booked publications	149
Scaling a publication, Freeing memory to large graphics	154
Assignment Test Solved (Multiple Choice Questions/Answers)	155-156
Adobe InDesign CS6	
8. Working with Adobe InDesign CS6	157-168
InDesign -An Introduction, InDesign CS6 Interface	157
Hide or show all panels, Manage Document windows, Dock and undock panels, Move panels	158
Create a new document, Document window, Change document setup	159

Create ruler guides, Create a ruler guide	161
Show or hide guides, Pages and Spreads, Change the page and spread display, Target or select a page or spread	162
Document with a two-page spread, Add new pages to a document, Arrange, duplicate, and remove pages	163
Duplicate a page or spread, Remove a page from a spread, Delete a page or spread	164
Control spread pagination, Move or copy pages between documents	164
Masters, stacking order, and layers, Create masters, Create a master from an existing page	165
Base one master on another, Copy masters, Apply master pages, Edit the options of an existing master	166
Reapply master items, Import a master from another document	167
Assignment Test Solved (Multiple Choice Questions/Answers)	168
9. Working with Layer and Text	169–177
Layer -An Introduction, Create layers, Specify layer options, Assign a layer color, Adding objects to layers	169
Select, move, and copy objects on layers, Paste objects into different layers, Change the order of layers	170
Show or hide layers, Lock or unlock layers, Add page, section, and chapter numbering	171
Add an automatically chapter number, Add an automatically section marker,	172
Create and edit text variables, Create or edit text variables, Delete layers	174
Text frames, Create text frames, Add text to a document, Type text in a document	175
Select text, Character and paragraph styles, Character style attributes	176
Next Style, Apply a character style to a drop cap	176
Assignment Test Solved (Multiple Choice Questions/Answers)	177
10. Working with Tools	178–197
Display the toolbox, View Modes, Control panel	178
Display the panel menu, Dock or float the Control panel, Use context menus, Change Interface preferences	179
Toolbox Introduction, Display the toolbox	179
Display tool options, Display and select hidden tools, Change the toolbox layout, Tools of InDesign CS6 Tool box	180
Change the toolbox layout, Working with Text	183
Combining text and objects, Anchored objects	187
Typography, Format Text, Copy type attributes (Eyedropper)	189
Working with Drawings, Types of paths and shapes	190
Using Paths, Working with Graphics	191
Paste or drag graphics, Copy and paste graphics, Drag and drop graphics	194
Frames and objects, Modifying objects using graphics frames, Paste an object into a frame	195
Remove a frame's content, Transparency effects, Apply transparency effects	196
Assignment Test Solved (Multiple Choice Questions/Answers)	197
11. Printing and Output	198–208
Printing and Output -An Introduction, Types of printing, Types of images, Color separation, Duplex printing	198
Print a document or book, Page printing options	199
Options for printing objects, Printing with multiple page sizes, Specifying pages to print	200
Setting up a printer	204
Creating separations, Prepare document for separations	206
Creating PostScript or EPS files	207
Assignment Test Solved (Multiple Choice Questions/Answers)	208
CorelDRAW X6	
12. Basics of CorelDRAW X6	209–222
Starting a document, Zooming, panning, and scrolling, Creating objects, Drawing common shapes	213
Creating lines and curves, Creating text, Creating tables, Working with bitmaps	214
Inserting bitmaps, Editing bitmaps, Selecting, sizing, transforming objects, Open a drawing	215
Finding and inserting drawing content, Working with templates, Create a template	216
Edit a template, Undoing, redoing, and repeating actions, Accessing drawing information	217
Zooming and Panning, Previewing a drawing	218
Working with views, Save a drawing, Backing up and recovering files	219
Assignment Test Solved (Multiple Choice Questions/Answers)	221–222
13. Working with Drawings	223–232
Drawing Basics, Draw a straight line, Add line segments to an existing line	223
Preview a line using the Pen tool, Create a line style, Copy outline color to another object	224
Apply a preset brush stroke, Drawing rectangles and squares, Draw a rectangle by dragging	225
Draw a rectangle with height and width Draw an ellipse with width and height	225
Drawing polygons and stars, Draw a Polygon, Drawing spirals, Drawing predefined shapes	226

Applying uniform fills	227
Contouring objects, Using lenses with objects	229
Assignment Test Solved (Multiple Choice Questions/Answers)	231-232
14. Refining Your Artwork	233-252
Working with Curve objects	233
Cropping objects, Splitting objects, Erasing portions of objects	234
Creating objects from enclosed areas, Working with Layers, Local layers and master layers	235
Changing layer properties, Showing and hiding layers, Printing and exporting layers, Renaming layers	236
Moving / Copying layers and objects, Sharing symbols between drawings, Copy symbols to the Clipboard	237
Working with fills, Changing the transparency of objects	240
Applying perspective to objects, Creating extrusions, Bevels	243
Extruded fills, Lighting, Vanishing points, Creating drop shadows	244
Blending objects	245
Using Text in Artwork, Wrapping paragraph text, Fitting text to a path	248
Adding tables to drawings, Adding bitmapped images	249
Save the ink settings	250
Assignment Test Solved (Multiple Choice Questions/Answers)	251-252
15. Printing a Drawing	253-261
To print your work, Laying out print jobs	253
Previewing print jobs, Fine-tuning print jobs, Printing colors accurately	254
Printing to a PostScript printer, Using the Print merge wizard	255
Working with imposition layouts, Printing printers' marks	257
Printing color separations	258
Exporting files, Export for Web, Printing to film	259
Assignment Test Solved (Multiple Choice Questions/Answers)	260-261

Adobe Illustrator CS6

16. Adobe Illustrator CS6: Interface Introduction	262-274
The Interface, Screen modes, Using the status bar, Enter values in panels / dialog boxes	263
Control panel, Move panels, Add and remove panels, Tools panel	264
View hidden tools, Move the Tools panel, Close a separate tool panel, Select a tool	265
Change tool pointers	266
New document profiles	272
Assignment Test Solved (Multiple Choice Questions/Answers)	273-274
17. Working with Objects	275-287
Illustrator Objects, Vector graphics, Bitmap images	275
Creating and opening documents, Creating new documents	277
Opening existing files, Setting up the artboard	279
Moving the printable area, Laying out artwork with precision, Changing the unit of measurement	280
Using rulers, Using the grid, Using guides	281
Using the Info palette, Displaying the Info palette, Viewing changes in position, Viewing the magnification factor	283
Importing artwork, Placing artwork	284
Importing artwork from PDF files	285
Using multiple artboards	286
Assignment Test Solved (Multiple Choice Questions/Answers)	286-287
18. Refining and Printing	288-302
Drawing simple lines and shapes, Drawing straight lines, Drawing rectangles and ellipses	289
Drawing arcs, Drawing spirals, Drawing paths	291
Direction lines and direction points	292
Changing the color mode of a document	294
Refining Artwork	295
Clipping masks	296
Create 3D objects, Importing artwork from Photoshop, Saving artwork	297
Export artwork, Creating text	298
Setting up documents for printing	299
Printing color separations	300
Assignment Test Solved (Multiple Choice Questions/Answers)	302

Adobe Photoshop CS6

19. Adobe Photoshop CS6: Interface Introduction	303–320
Basics of image editing, Editing programs, Digital data compression	306
Image editing features, Selection, Layers, Image size alteration, Cropping an image, Histogram	307
Noise removal, Removal of unwanted elements, Selective color change, Image orientation	308
Perspective correction and distortion, Lens correction, Sharpening and softening images	308
Selecting and merging of images, Special effects, Change color depth, Contrast and brightening, Printing	309
Using Tools, Change tool pointers	311
Using the options bar, Use the Rotate View tool, Use the Navigator panel, Info panel	312
Manage windows and panels, Manage Document windows, Dock and undock panels, Undo and Redo history panel	314
Revert to a previous image state, Delete one or more image states, Creating new images	316
Opening Image files, Create a Duplicate image, Saving image files	316
Image selection, Using the Select menu	317
The Move tool, Copying selections	318
Assignment Test Solved (Multiple Choice Questions/Answers)	319–320
20. Shapes, Paths and Colors	321–338
Interface Introduction, Shapes and paths, Using the shape tools, Making shapes, Using custom shapes	321
Creating rasterized shapes, Setting shape tool options	322
Using the pen tools, Drawing with the Pen tool, Using straight segments with pen tool, Drawing curves with the Pen tool	323
Creating paths, Paths palette	325
Creating a work path, Anchor points, direction lines etc., Path Selection	326
Moving, reshaping, and deleting path, Color Processing	327
Using the color correction tools, Tone correction	328
Sharpen the edges of the image, Viewing the pixel color value, Info palette & Eyedropper /Color	329
Using Levels dialog box, Adjust the tonel range	330
Using Curves command, Correction by Color Balance	331
Using the Shadow/Highlight command, Using the Brightness/Contrast, Convert an image to Bitmap mode	333
Convert a color photo to Grayscale, Use the Brush tool or Pencil tool, The Art History Brush tool	333
Working with brushes, Using the Eraser tool, Using the Magic Eraser tool	334
Using Gradient tool, Using the Paint Bucket tool	335
Using the Color palette, Using the Swatches palette, Creating patterns	336
Assignment Test Solved (Multiple Choice Questions/Answers)	337–338
21. Layers, Text and Filters	339–350
Using the Layers palette, Background layer, Creating new layers and layer sets	339
Selecting layers, Linking layers, Aligning layers	340
Locking layers, Renaming layers, Deleting layers, Flattening all layers, Setting layer opacity	341
Layer effects and styles, Creating custom styles, Masking layers	342
Working with text, Type and type layers	344
Entering type, Enter point type, Enter paragraph type	344
Resize a type bounding box, Edit text, Apply anti-aliasing to a type layer, Select characters	345
Character panel, Paragraph panel	346
Create and edit type on a path, Enter type along a path, Move or flip type on a path	347
Move a path with type, Change the shape of a path with type, Warp and unwarped type	347
Warp type, Unwarp type, Convert type to shapes, Add a drop shadow to text, Using Filters	348
Assignment Test Solved (Multiple Choice Questions/Answers)	349–350
22. Printing and Color Separation	351–356
Printing in Adobe Photoshop, Desktop printing	351
Print images, Set Print options	352
Set page setup options	353
Reposition an image on the paper	353
Scale the print size of an image	353
Print part of an image	353
Preparing images for press	353
Set output options	353
Print separations	354
Assignment Test Solved (Multiple Choice Questions/Answers)	355–356
Appendix: DTP (Desktop Publishing) Glossary	357–360
